Security Standards

The Bank employs leading edge technology to make Bualuang iFunds secure and reliable.

Secure Socket Layer (SSL)

SSL encrypts and converts all data that moves between you and the Bank into numerical coding. This encryption process ensures that the data remains secure.

256-Bit Encryption

The Bank uses a 256-Bit algorithm, which is the highest level of encryption currently available for use in the world's banking industry.

Firewall

The Bank uses several firewall layers to protect the integrity of our system and your personal data.
