Bangkok Bank

iTrade

New Digital Banking for Export and Import Services from Bangkok Bank
Digitized Trade Finance to Empower Your Business

Key Benefits

Simplified Experience

Modern user interface, easy-to-use, can be accessed via web browsers through PC, laptop, tablet, and mobile phone.

Fast Transactions

Easy to create transactions as you can generate them using templates or previous transactions and attach digital file.

Smart Decisions

The dashboard displays show overall data and the status of transaction. You can download reports to use business analysis to develop your business.

Additional Information

Service Feature

The new digital banking for export and import services will enable you to digitally manage all your international trade transactions end-to-end with an easy-to-use web application. The system will provide a full range of export and import services. You can manage transactions more efficiently, quickly and conveniently.

Initially you can manage Documentary Trade (Letter of Credit) transactions.

For the upcoming stages, the full suite of new iTrade services including all import and export services will be available.

Key Benefits

Simplified Experience

The modern and intuitive user interface will provide you with an enhanced user experience that is easy-to-use, can be accessed anywhere via web browsers, and which supports a wide range of devices including PC, laptop, tablet, and mobile phone.

Fast Transactions

You will find it easier to create and manage transactions as you can generate them using templates or previous transactions. The system supports many digital attachments file types, such as JPG, PNG, PDF. With real-time e-mail notifications, your company can closely track transactions.

Smart Decisions

The dashboard displays graphs that show overall data and the status of each transaction. You can download transaction reports to help with internal management and use business analysis to develop your business.

Peace of Mind

Transactions are secure and meet international security standards. All transactions are encrypted and require 2-factor authentication from approvers for log in and approval.

Benefits

- Less need to visit the Bank and no service fee*.
- Reduce working process and increase efficiency.
- Create and approve transactions conveniently online.
- View information and status of transactions 24x7.

*Free token for the first 2 devices and 1,000 baht per device after that.

Who Should Apply?

Exporters and importers who want to transact online without needing to submit an application/contract or provide supporting documents at the Bank.

How to apply

For more information, call us at Corporate Service Center (66) 0 2031 7888 on Monday - Friday (excepting Bank holidays) from 8:00a.m.–8:30p.m.

State-of-the-art Security

Secure Socket Layer (SSL)

With new iTrade's SSL, your data will be encrypted to ensure that it is transmitted securely through global standard technology.

Firewall

We use several levels of firewall to protect our system and your data.

Two-factor Authentication

Users must have a password and a token. The administrator and approver are required to use the OTP from the token and password to login to the system each time.

User Entitlement and Authorization

With new iTrade, data extraction, initiation, and authorization for banking transactions is controlled through the user profile. Each user profile is created with specific authority and access to a specific type of information. Each user is assigned a user profile, whereby they are granted the authority permitted with the assigned profile.
